COVENANT TECHNOLOGY PARTNERS CASE STUDY

Optimizing Digital Solutions: The Power App Launch Pad

Power Platform

BUSINESS PROBLEM

A premier luxury fashion brand was facing significant challenges with their Power App project, "Launch Pad," which was intended for use by the Maison and legal teams. The primary issues included usability and functionality. The app needed to be more user-friendly and efficient to meet the needs of the Maison and legal teams. Several features and functionalities were either incomplete or required enhancements to improve the overall performance and user experience of the app

The primary issues included:

- **Usability**: The app needed to be more user-friendly and efficient to meet the needs of the Maison and legal teams.
- **Functionality**: Several features and functionalities were either incomplete or required enhancements to improve the overall performance and user experience of the app.

OUR OBJECTIVE

Our objective aimed to provide consulting and development services to assist this high-end luxury fashion brand in completing the Power App project. The specific objectives included enhancing functionality, improving and completing the existing features of the Launch Pad Power App to ensure it met the requirements of the Maison and legal teams, streamlining processes to optimize the app's usability and efficiency, and working closely with this fashion brand's IT team to define, prioritize, and test tasks for the app.

OUR SOLUTION

We offered PowerApp consulting and development services. The detailed tasks included oversight and support for the project, finishing the 'Search' box for View Submissions, adding the ability to add a new 'Dealer,' auto-populating relevant 'Dealer' fields if the selected dealer already exists, adding a search page with filters for searching the SharePoint Library, adding administrative shortcuts to various screens, updating the approval workflow, exporting data to Excel via Power Automate, setting required fields as mandatory, enhancing the 'Review Approval' status page, modifying the 'View Submissions' gallery, and customizing SharePoint List views

THE RESULTS

The project followed an **agile approach**, allowing for flexibility, quick results, and continuous improvement.

The collaboration between Covenant and the luxury fashion brand ensured that the Power App project met the needs of the Maison and legal teams.

The **key results** included improved usability, making the app more user-friendly and efficient, enhanced functionality, providing a better overall user experience and performance, and successful collaboration, leading to the successful completion of the project
