

# LMS365 and Microsoft Viva Learning

With the Viva Learning app in Microsoft Teams, people are offered a **centralized learning hub** from where they can explore courses from a variety of providers.

**Bring structured, trackable training from your LMS365 learning management system into Microsoft Viva Learning** and ensure that learning is available throughout the tools people are already using. LMS365 is automatically included in the list of available content providers for your Viva Learning application.

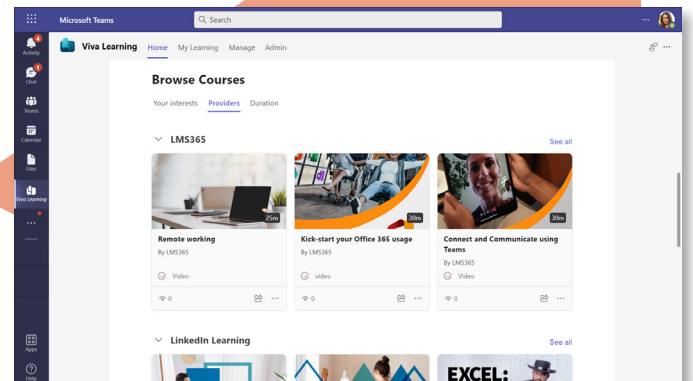

## LMS365 in Viva Learning enables you to:

- 1** **Build your own training** that includes both instructor-led training and other content
- 2** **Create targeted learning** ensuring that people have the exact skills they need
- 3** Create learning that **supports the professional development** of employees
- 4** **Get detailed data about the learning progress** and keep track of learning records
- 5** Prevent skills gap with **structured reskilling and upskilling** training
- 6** **Foster growth** by making learning available in the flow of work

# A closer look at LMS365 in the Viva Learning experience

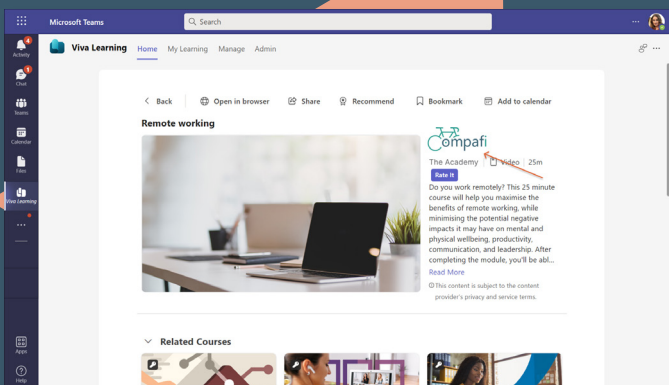

## Made for the Viva experience

When the integration is enabled, **courses and training plans from your LMS365 solution will be shown in cards**, side by side with the other learning content you choose to display in Viva Learning - branded for a seamless learning experience.

## Brand your internal learning platform in Viva Learning

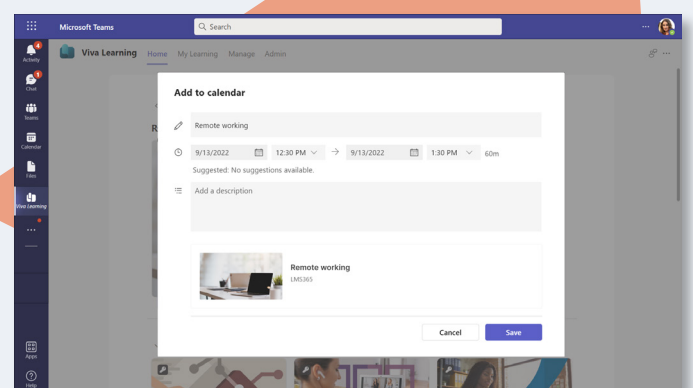

From within LMS365, you can **customize the provider's name and icon of courses and training plans** from LMS365. This allows you to brand your internal learning platform and make the origin of training clear to learners.

## Stay on top of important learning activities

From Viva Learning, **learners can open courses from your LMS365 solution to start the training**, share or recommend it, bookmark the course for later, or add it to their calendar to schedule the training.

**All training activities are reported in LMS365**, ensuring you keep track of important learning data.
