  Easily work together from the same playbook.
- **Sync your data sources**
  Gain clear insights from streamlined reporting.

Get More from Your Dynamics 365 Investment with CPQSync

- CPQSync is a SaaS solution that delivers a better selling experience for salespeople and customers.
- CPQ solution embedded within Dynamics 365 for Sales—no pop-ups or new windows
- Open platform and APIs enable extensibility
- Integrate workflows with Power Automate
- Built on Microsoft Azure multi-tenant solution

Experience Selling. Made Simpler.™

Increase revenue and profitability by enabling sales teams with **CPQSync** by Cincom.

Selling as Easy as 1-2-3

1 Salesperson opens product catalog within the Dynamics 365 interface and selects the product they want to configure.

2 Salesperson configures product options—within defined engineering rules—based on customer needs identified via guided selling.

3 Salesperson quickly generates a quote, complete with BOM and other critical product information, and shares with their customer.

Benefits of CPQSync

- Quote to order – 365 Sales Finance and Operations, end to end
- Configure product and pricing intuitively
- Leverage Power Automate to integrate data and workflows
- Eliminate knowledge silos
- Insight and visibility into your teams' activities
- Improved efficiency for Sales, IT and Engineering
- Faster, more accurate sales quotes
- Control margin and profitability on deals quoted
