

# 2022 The year of intelligent retail

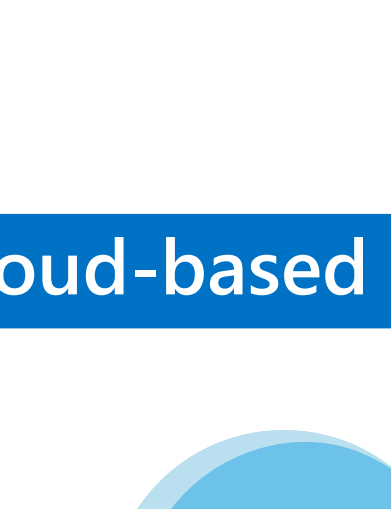

Today's innovations in technology are opening new doors for retailers. The ability to infuse data and intelligence in all areas of a business has the potential to completely reinvent retail. Here's a look at the top technologies we see enabling this transformation in 2022 and beyond, and where they'll have the greatest impact.

## 5 top technologies powering intelligent retail in 2022

### 01 Advanced analytics

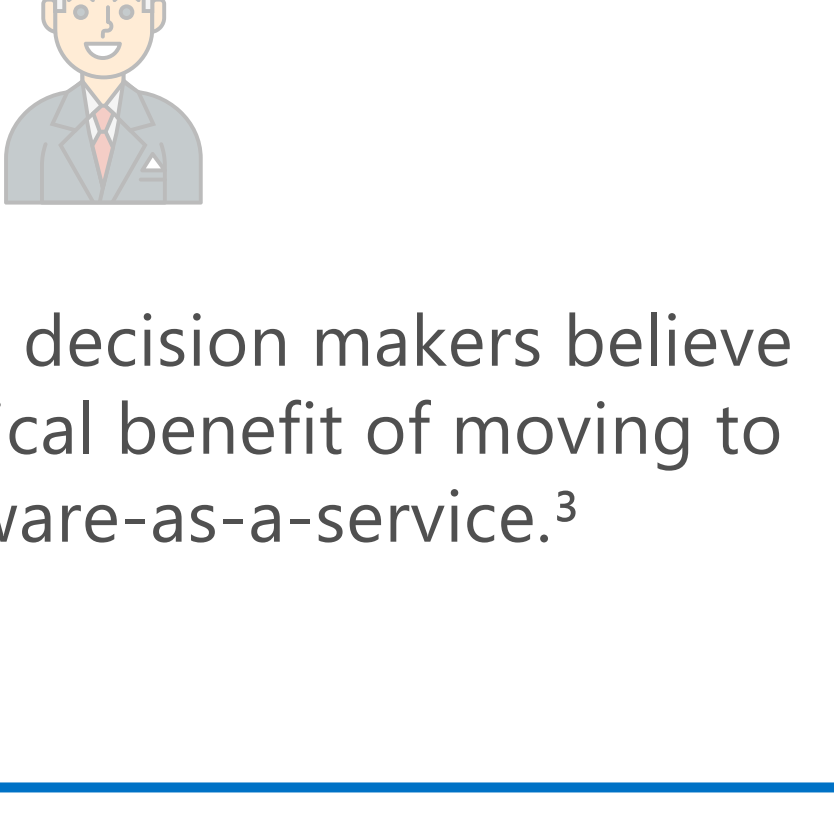

**3/4**

Within the next 3 years, over **three-quarters** of retailers plan to invest in **big data solutions** for IoT data and 72% in cognitive computing and machine learning.<sup>1</sup>

### 02 Artificial intelligence

By 2023, about **40%** of retailers will develop a customer experience supported by AI, boosting conversions up to **30%** and revenue by **25%** through hyper-micro personalization.<sup>2</sup>

### 03 Cloud-based architecture

**71%** of retailer software decision makers believe that agility is a critical benefit of moving to cloud-hosted software-as-a-service.<sup>3</sup>

### 04 Internet of Things

**70%** of retailers will install in-store beacons for location-based marketing by 2024.<sup>4</sup>

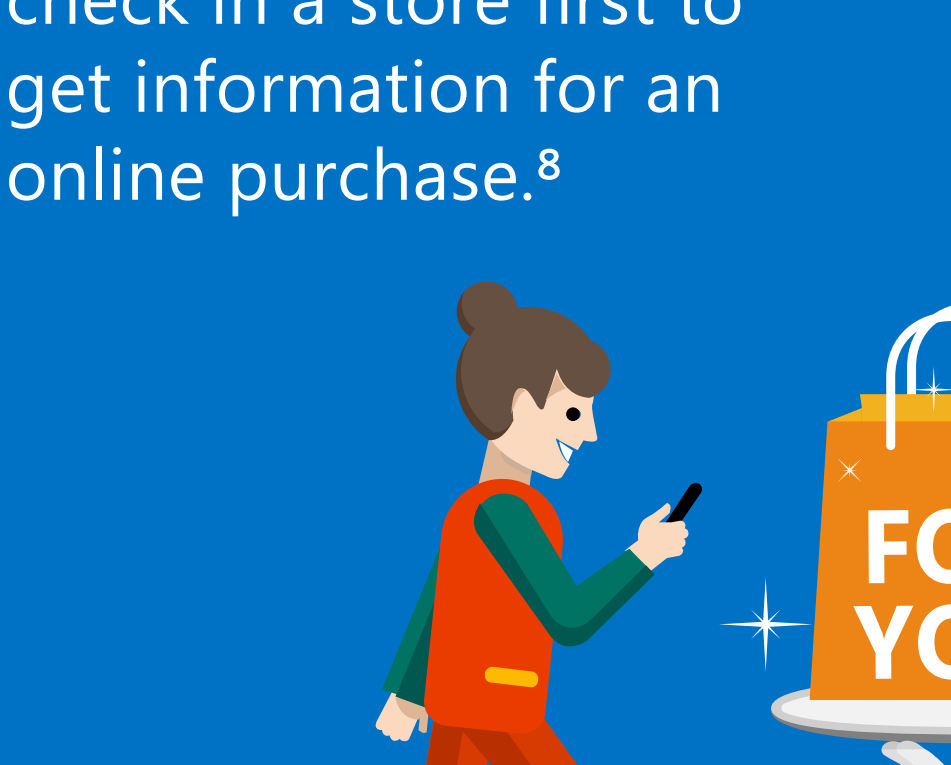

### 05 Conversational commerce

**50%**

By 2023, **50%** of **retail customer service requests** will be conducted, at least partially, through conversational AI applications.<sup>5</sup>

## Where will these technologies drive the most impact?

A shopper who engages with a retailer through social media is likely to spend **19% more** than the average consumer.<sup>6</sup>

Nearly a **third of CPG sales processes** can be automated, freeing up the sales force to spend more time connecting with customers.<sup>7</sup>

of **Gen Z shoppers** still prefer to purchase in-store, and **46%** will check in a store first to get information for an online purchase.<sup>8</sup>

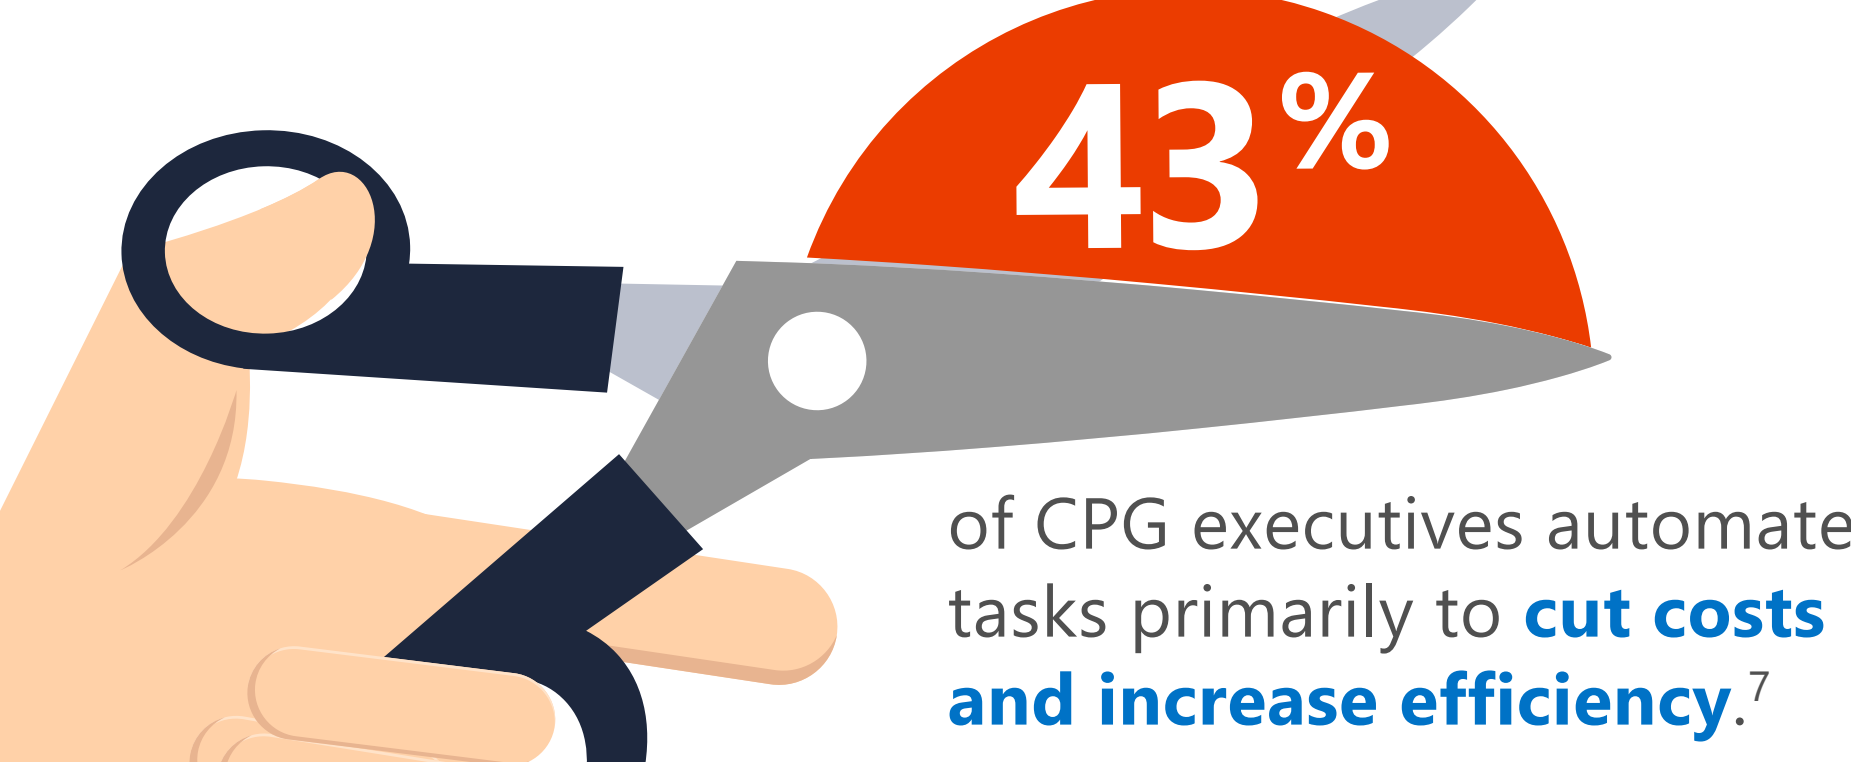

By 2023, **over half** of shoppers will expect near-perfect fulfillment.<sup>2</sup>

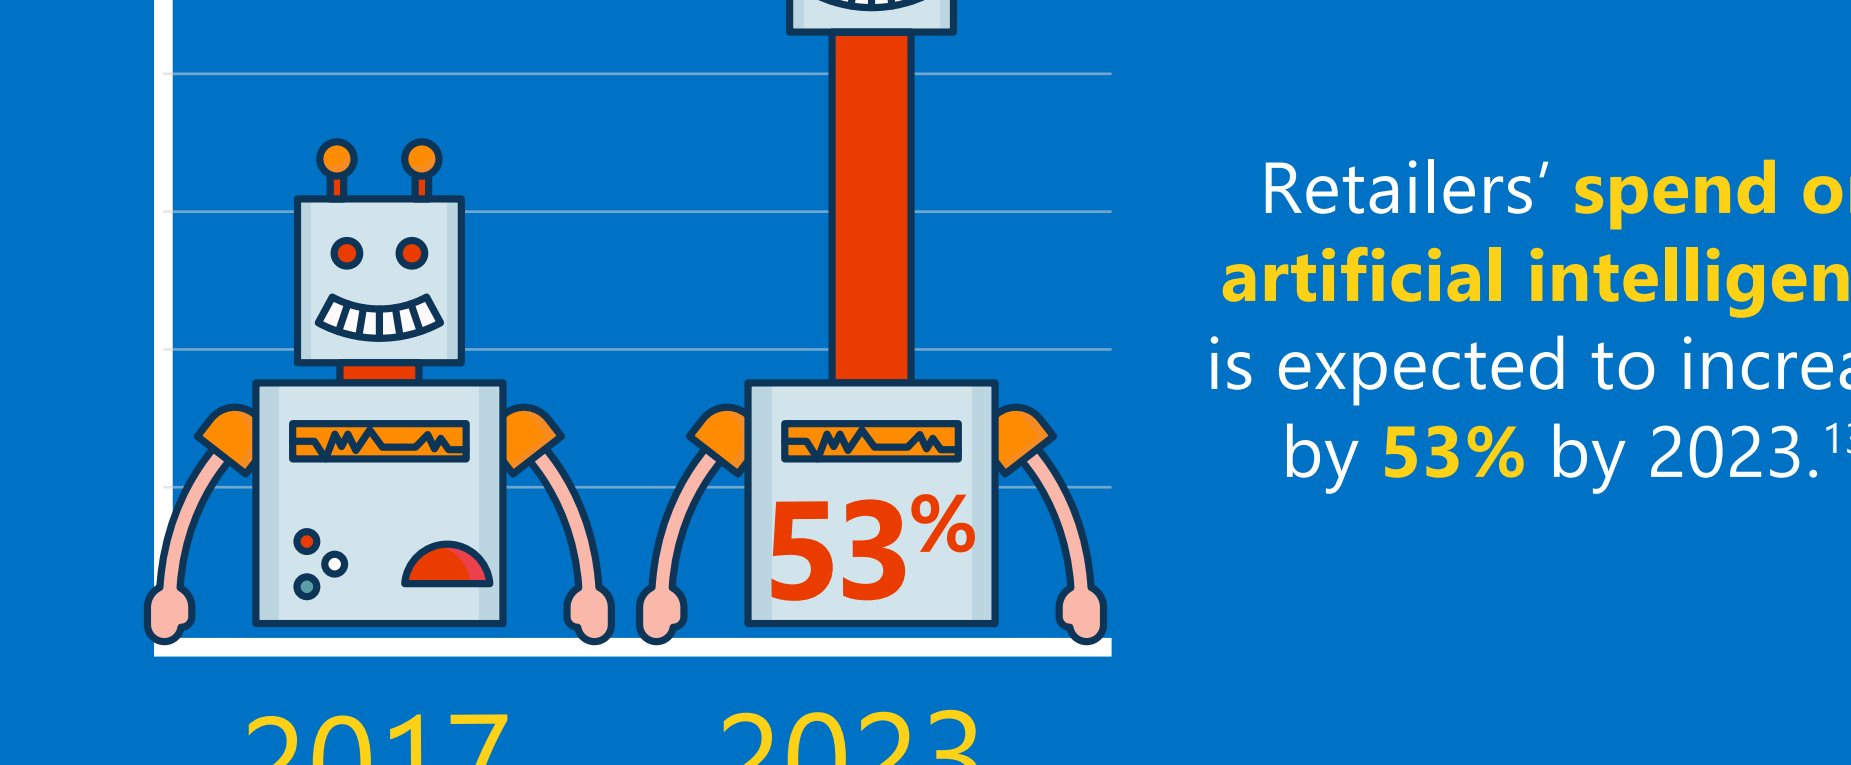

Nearly **half of surveyed consumers** said they likely would become repeat buyers after personalized experiences, yet **only 22%** of shoppers find their retail experience to be highly personalized.<sup>9</sup>

## What areas do retailers prioritize for taking advantage of these innovations?

of retailers plan to **reinvent their supply chains** with real-time visibility enabled by automation, sensors and analytics.<sup>10</sup>

**68%** of retailers plan to invest in data tracking, collection and management.<sup>11</sup>

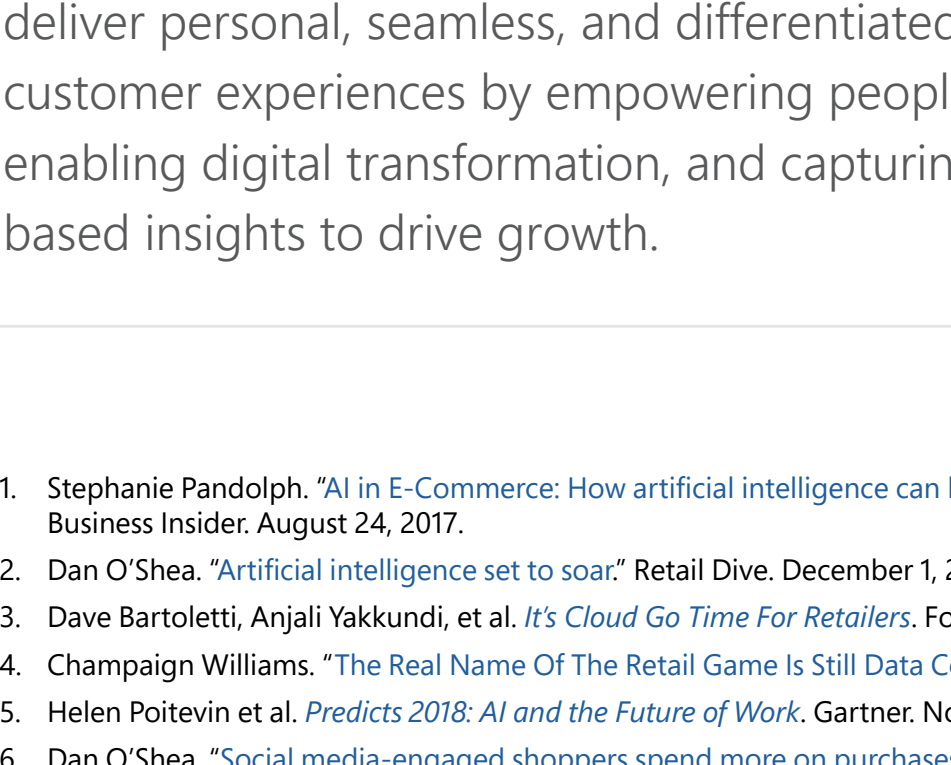

**55%** plan to invest in in-store experiences.<sup>11</sup>

By 2022, **more than half** of European and U.S. total retail sales will be online or influenced by digital touchpoints, including in-store sales that are influenced by digital research beforehand.<sup>12</sup>

**43%** of CPG executives automate tasks primarily to **cut costs and increase efficiency**.<sup>7</sup>

## What are the innovations to watch for in 2022 and beyond?

2017      2023

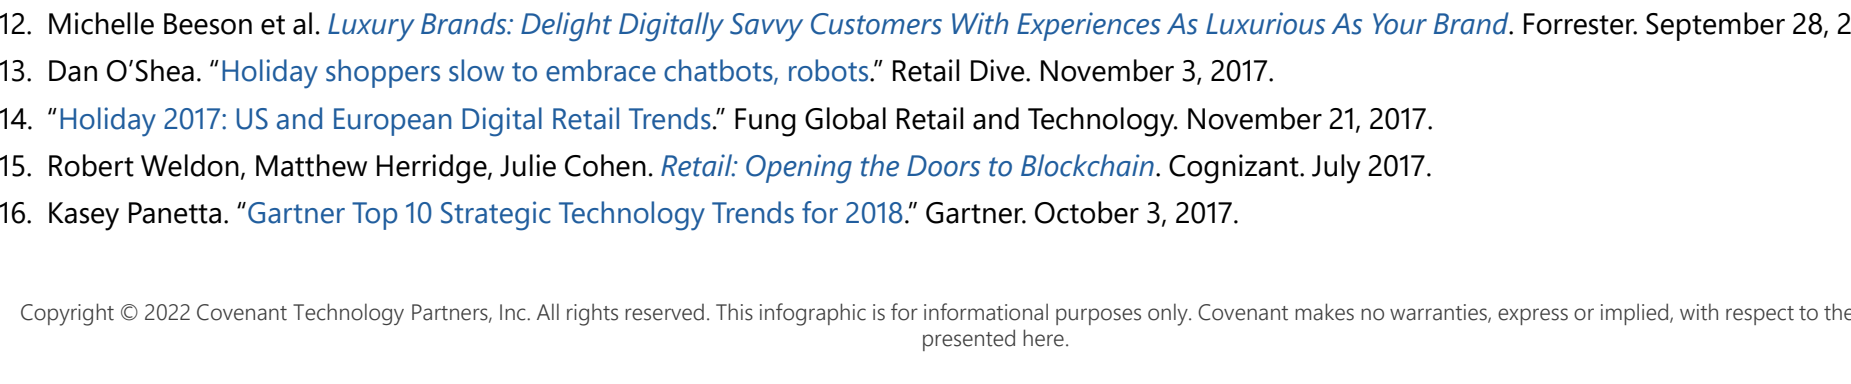

Retailers' **spend on artificial intelligence** is expected to increase by **53%** by 2023.<sup>13</sup>

In just three years, **nearly half** of retailers... will have adopted AI-powered chatbots and digital assistants.<sup>14</sup>

**82%** of retailers predict **blockchain will yield cost savings** of more than 2.5% by streamlining operations and automating manual tasks.<sup>15</sup>

**65%** of retailers plan to invest in inventory and supply chain **automation** by 2023.<sup>10</sup>

**Mixed reality** is emerging as the immersive experience of choice.<sup>16</sup>
