

Client Story: Save-A-Lot

Teams Voice Case Study

Problem

Client was moving HQ and did not wish to move an old outdated phone system. The client also had multiple vendors for meetings/conferencing. We saw this as an opportunity to provide a single solution in Microsoft Teams.

Solution

Implemented Microsoft Teams for Voice and Conferencing for the entire organization. Providing them a single vendor with a more modern solution.

Results

Removed redundant solutions/vendors while providing a much more stable audio solution.
