Microsoft  
Preferred Solution

Microsoft  
Certified App

## Companies use LMS365 for:

### Employee Onboarding

Automate the onboarding process and easily deliver important content to new hires

### Compliance Training

Automate the process of managing corporate, health, safety, financial, regulatory, and other compliance training

### Software Adoption

Get employees onboard with new technologies with tool trainings and adoption analysis

### Social Learning

Create content that is more interactive and collaborative to boost team engagement

### Tracking and Reporting

Accurately track and report on learner progress to meet regulatory and corporate requirements

### Democratized Learning

Change knowledge into learning by empowering your employees to find, suggest or create training

### Personalized Training Plans

Create personalized training plans to ensure each individual employee receives the training they require

### Data-driven Decisions

Make data-driven decisions through ready-made, analytical Power BI templates and fully customized data dashboards

# Why invest in LMS365?

Collaborative Learning with Microsoft Teams

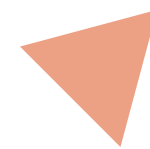

Integrate Learning with SharePoint

Track Training with Power BI

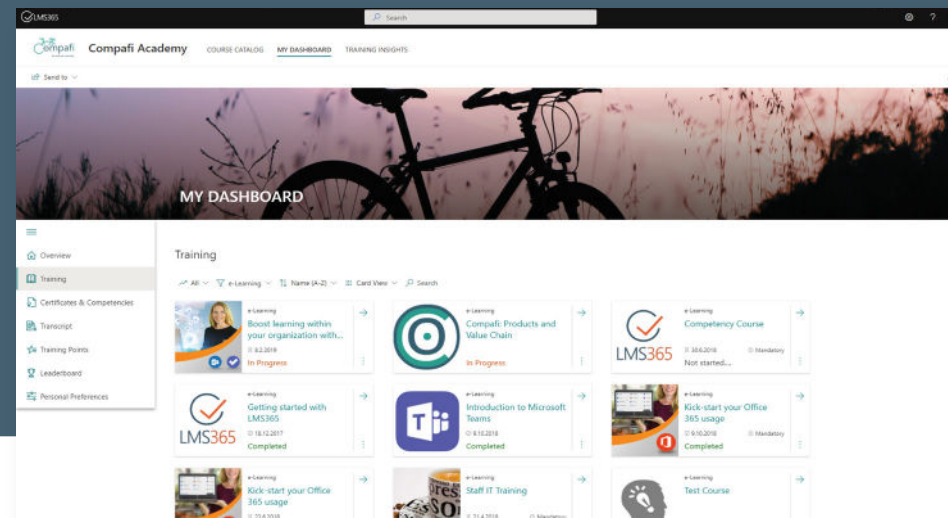

Add Structured Learning to Microsoft Viva

LMS365 provides a **complete learning management platform** for Microsoft 365, SharePoint and Teams, keeping customer content and data in a single, secure platform.

- 1** Around the clock access to training content from any desktop or mobile platform
- 2** Ability to sign into the training platform using a Microsoft log-in
- 3** Create custom courses and manage content that leverage Microsoft 365

- 4** Access learning in a familiar environment through Teams and Sharepoint
- 5** Boost Microsoft 365 adoption through training
- 6** Utilize Azure Active Directory and Office 365 Groups for user management

## Learning in the flow of work

LMS365 can be accessed through Microsoft Teams, allowing companies to incorporate engaging and collaborative learning content directly into the flow of work within a shared, virtual workspace.

## Take your training offline with the LMS365 app

With the LMS365 mobile app, learners can take training offline. When they get back online, all their learning data will be synchronized. This feature is essential for many firstline workers, who can take their training with them wherever they go, even without an internet connection.
