

# Sage Intacct vs Dynamics 365 Business Central

## Why Choose Microsoft?

**Dynamics 365 Business Central** is a complete cloud-based business management solution. It integrates seamlessly with M365 and the Power Platform and offers more value, features, and flexibility than Sage Intacct. Its global availability, artificial intelligence, and process automation capabilities help small and medium-sized businesses streamline their operations to improve customer service and grow revenue.

*Sage Intacct* is a more expensive and less comprehensive solution that lacks the flexibility and high-impact capabilities of Dynamics 365 Business Central.

Feature	Business Central	Sage Intacct
<b>Cost per user</b>	Lower and transparent	Higher and hidden
<b>Functionality</b>	Comprehensive business management solution	Accounting and financial management software
<b>Licensing model</b>	All-in-one licenses that cover finance, sales, service, manufacturing, supply chain, and more	Extra charges for many modules and features
<b>Microsoft integration</b>	Native integration with Microsoft 365, Power Platform, Azure, and other Microsoft solutions	Limited or no integration with Microsoft products
<b>Artificial intelligence</b>	AI-powered features to generate creative product descriptions, predict late payments, and optimize business processes	Limited with no generative AI features announced
<b>Partner ecosystem</b>	Larger and more diverse partner network that can deliver the last mile of functionality for any industry or business need	Smaller and less varied partner network. 17 industry editions with limited functionality
<b>Cloud-based</b>	Yes – common platform & Azure tenant simplifies admin tasks	Yes – runs on AWS
<b>Global availability</b>	155 countries and 47 languages	5 regions and English only
<b>Workflow Automation</b>	Power Automate with over 1,000 connectors	Contained within application, less flexible
<b>SLA</b>	99.9%	Lower
<b>User Interface</b>	Unified & LCNC tools to enable developers of all kinds	Different & requires investment in specialized training for development or custom report writing that isn't reusable
