COVENANT ACCELERATE | APPLICATION MODERNIZATION

App Health Check

A clear answer for your custom app in two weeks. AI does the heavy lifting; our engineers verify every finding.

Estimated $8,900 | 2 weeks | 1 application

Windows Server 2016 extended support ends January 12, 2027. Know what to do with your app before the deadline.

Sound familiar?

- Your app runs on an aging or out-of-support framework like .NET Core 3.1, older Angular or ASP.NET Web Forms.
- It's hosted on Windows Server 2016 and the support clock is running out.
- Documentation is thin, testing is manual, and only one or two people know how it works.
- It moved to Azure virtual machines, but the app itself never changed.

What you get

- A readiness scorecard across eight dimensions, from framework currency and security to integrations and business risk.
- A clear verdict: upgrade, rebuild, replace, retire, or keep and monitor. If it isn't worth modernizing, we'll tell you.
- A risk register and a prioritized backlog you can use with us or your own team.
- A 12-month roadmap and an executive readout for your leadership.

How it works

1 Scope

30-minute call and statement of work

2 Discover

Week 1: read-only access, app owner interviews, AI analysis of code, dependencies and integrations

3 Verify

Week 2: engineers validate every finding and score the app

4 Decide

Scorecard, roadmap and executive readout. Nothing changes without your approval.

You stay in control

- You own everything we deliver: code, documentation, repos and pipelines.
- No production secrets or credentials go to AI agents; only data you approve goes to approved AI services.
- No speed or savings promises up front. We measure, then report actuals.

Why Covenant

Covenant Technology Partners is a Microsoft partner based in St. Louis. Our Application Development practice pairs agentic AI tooling with experienced engineers, and when the assessment is done we can deliver the upgrade or build, with ongoing support from Covenant Modernize.

Book a 30-minute scoping call

[Sales contact name] | [email] | [phone] | covenanttechnologypartners.com/app-health-check

Estimated $8,900

Estimated price; final fixed fee confirmed in the statement of work after scoping. Larger portfolios or complex systems are quoted separately. Results are measured and reported during the engagement; no savings or speed figure is guaranteed. Microsoft funding is subject to eligibility and checked per customer.
